WOMEN WOULD SPUR SOLONS TO ACTION

Federation of Clubs Champions the Toilers.

AN APPEAL TO CONGRESS

Measure Advocated Calling for Investigation of Industrial Conditions of Women and Children.

CHICAGO, May 6.-Representatives of 800,000 women will petition Congress to pass the measure calling for an investigation of the industrial conditions surrounding the women and children who toil in this country when the members of the General Federation of Women's Clubs meets in St. Paul on May 30.

The demand that Congress take some action will be one of the most important questions that will arise during the convention. It is expected the sessions will be among the most important in the his-

tory of the club woman.

The first sessions will be held on the evening of May 30 and the delegates will gather in the armory. Delegates representing more than 800,000 women of the gather in the armory. Delegates repre United States, England, Alaska, Wales Ireland, Porto Rico, South America, and western Australia will gather at the convention and discuss almost every topic of interest to the woman.

Pure Food an Issue.

Many topics have already been assign many of the debates will be lively. There is no question of sufficient importance, however, to overshadow all others. The question of pure food is likely to develop much discussion. A committee has been appointed to investigate this question, and it is expected the report will be followed by a general discussion.

The members of the industrial committee, of course, will recommend that Congress pass the act calling for an inestigation of the conditions surrounding the women and children who work. Civil service reforms will offer another topic of discussion. Several of the delegates are in favor of radical reforms in the present methods and it is probable a lively debate will follow the introduc-tion of the subject.

Consider Forestry Question. Forestry will offer another subject

that should develop a lively debate. It is possible that resolutions calling or ongress to assist in the work of saving the forests may be introduced, although this is not known definitely. A committee has been appointed to investigate the question.

Legislation will serve as another topic for discussion. The members of the committee having this question in charge have not yet given an inkling of their findings and their recommendations are, of course, a secret.

Those in charge of the convention

expect it to be an enthusiastic gather
